Core Protection

FIREWALL PROTECTION

- Blocks unauthorized access to the business network.
- Customized rules based on observed network traffic.
- ✓ Policy exception for specific IP addresses.

IDS/IPS

- Intrusion Prevention.
- ✓ Port Scanning Attack Prevention.
- DDoS(Distributed Denial of Service) Attack Prevention.

Core Protection

Anti – Ransomware Protection

100% effectiveness score to Seqrite Endpoint Security (EPS) Enterprise Suite Edition for real-time protection against ransomware threats.

How can you be proactive?

DNA Scan

Behavour Analysis

What if you know your data is securely backed up when a ransomware strikes and you don't have to worry about recovering your files?

The Backup and Restore feature of Seqrite helps you achieve this.

Prevention and Monitoring

- Comprehensive and cumulative information of all hardware and software configuration of all endpoints.
- Notifications sent on emails to IT administrators.

FILE ACTIVITY MONITOR

- Monitors all the files that move in and out of the network.
- Detailed overview of all actions against confidential files of all formats.
- ✓ An invaluable tool to detect data leakage.

SEGRITE

Prevention and Monitoring

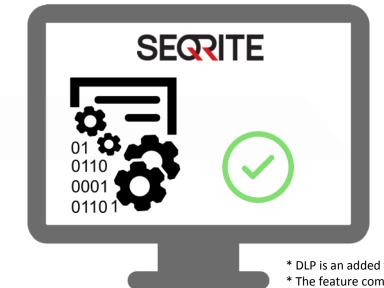

Prevent data leakage and theft of IP from your business.

Ensure that confidential data never leaves your network.

View all files and data on your systems from anywhere.

Get notified about data transfer through emails, drives and more.

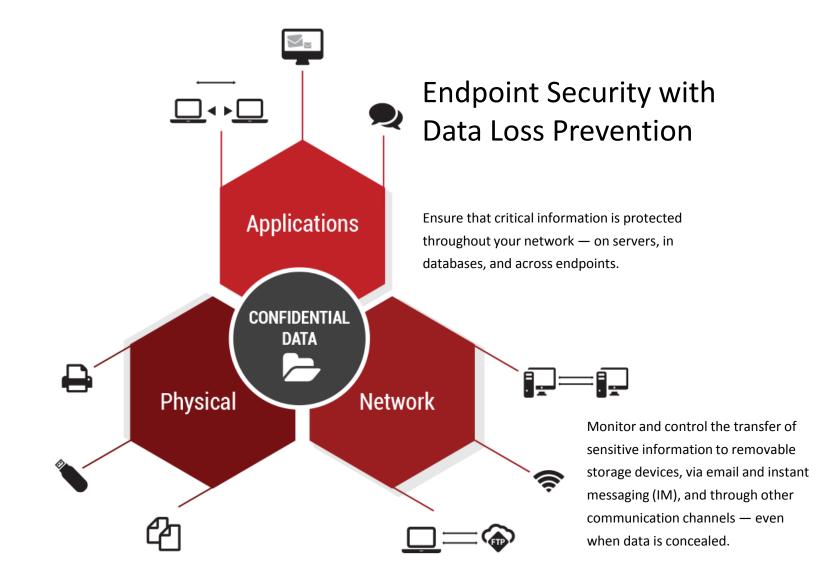

* DLP is an added feature pack with EPS Total and Business Editions. * The feature comes integrated with EPS Enterprise Suite.

Prevention and Monitoring

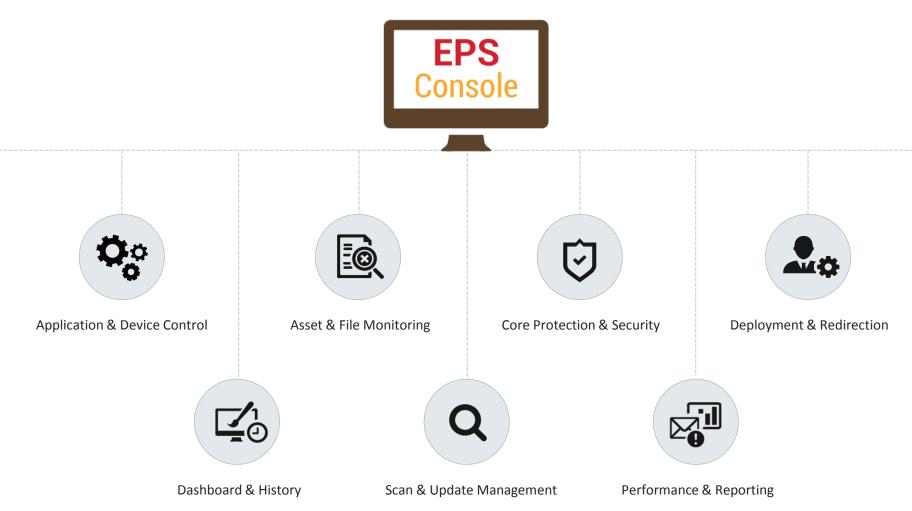

Management Console

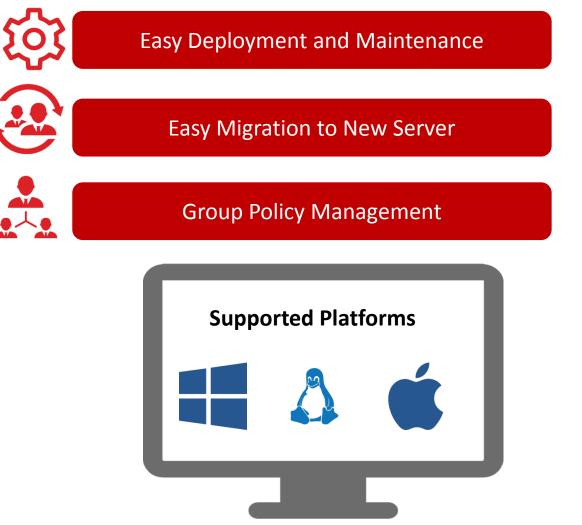

Integrated Tools and Data Loss Prevention

Lowers Complexity with Easy Deployment and Centralized Management

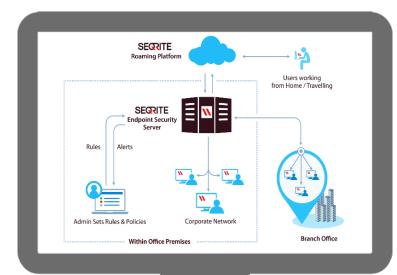

Management Console

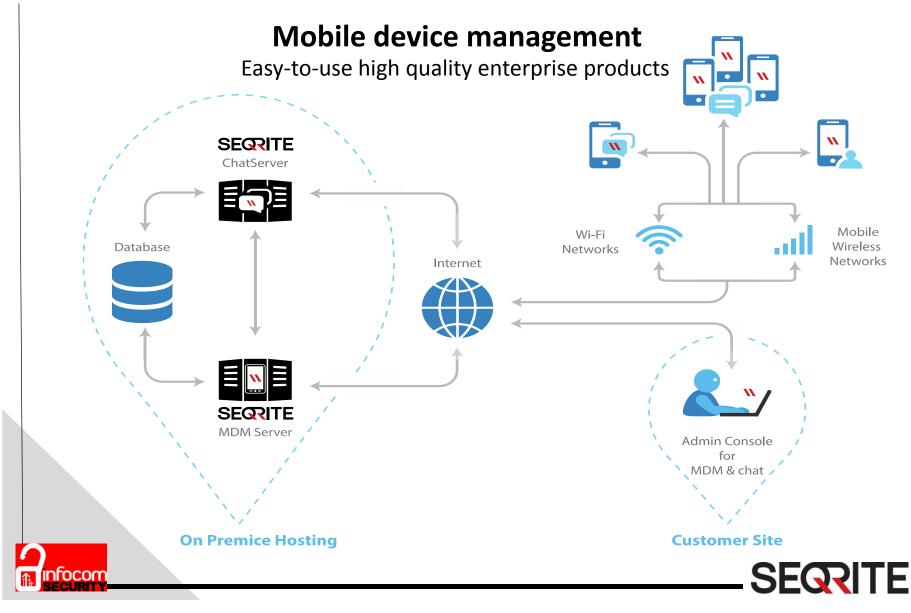

- Cloud-based solution to manage endpoints outside the enterprise network.
- Apply security policies and check compliance status.
- ✓ Monitor and scan security threats.
- Reports and notification of all endpoints.
